NSAI	Document Ref.:	AD-AC-0634
	Revision:	1.0
Plating of vehicles – Workshop Record – Plating of Trailer or Semi-Trailer. Form PV2.	Date issued:	2026-05-29
	Page:	**1** of **1**

Vehicle owner: .....
Address: .....
.....
Description of vehicle (as per Plating Guidelines): .....
Vehicle Registration Number: .....

Vehicle Identification Number: | | | | | | | | | | | | | | | | | |

Name of Manufacturer:						
Type Approval Number (if available):						
			Weights not to be exceeded in the State (IE)	Maximum authorised weights (EU)	Technically Permissible Weight	Axle Group (if applicable)
Maximum permitted laden weight (**trailers only**, not applicable for semi-trailers) (**kg**):						
Axle weights (kg)	Load Index	Single or Twin **S/T**				
0 *						
1						
2						
3						
4						
5						
6						
Vehicle Length (m):	**L =**				**(to 2 decimal places)**	
Vehicle Width (m):	**W =**				**(to 2 decimal places)**	
Is coupling adjustable?				Yes	No	
Data relating to length of combination.			Adjustable	bmax (m):	bmin (m)	
Centre of coupling to rear of vehicle:			Non-adjustable	bmax (m)		

*** King pin maximum mass / coupling maximum mass**

Axle spacing X (m)	m	**For full trailers only.** See max weights below
Tandem axle spacing (m):	m	Less than 1.0m, max. weight transmitted is 11.5t. Between 1.0 and 1.3m, max. weight transmitted is 16t. Between 1.3 and 1.8m, max. weight transmitted is 18t. Greater than 1.8m up to 2.5m, max. weight transmitted is 20t.
Triaxle spacing (m)	m	Less than 1.3m, max. weight transmitted is 21t. Greater than 1.3m, max. weight transmitted is 24t.
Four axle bogie spacing (m):	m	Max weight is 24t.
2 axle trailer only		If < 3m, max. weight is 16t. If > 3m, max. weight is 18t.
3 axle trailer only		Max weight is 25t. Subject to 5.5t per metre of axle spacing X
4 axle trailer only		Max weight is 30t. Subject to 5t per metre of axle spacing X
