- Panellists endeavour to respond to Q
- 4 Poll questions
- Comfort break – stay connected
- Finish 13.30.

About NSAI

Four main divisions

Standards are ubiquitous

What is a Standard?

- “Standard means a technical specification, adopted by a recognised standardization body, for repeated or continuous application with which compliance is not compulsory”
- European regulation on standardization (EU) 1025/2012

Why use a standard?

- Customer requirement
- Assist trade by eliminating technical barriers
- Promote new technologies and good practice – sharing knowledge
- Promote interoperability
- Increase safety of products, protect health, environment etc – consumer confidence
- Assist compliance with legal obligations.

NSAI National Standard Committees

- Principles of standard development
 - Transparency
 - Openness
 - Impartiality and consensus
 - Relevance and effectiveness
 - Development dimension
