1 Chairman's Statement

ETC TC21 continues to monitor developments in the Electrostatics standards field.

2 Introduction

NSAI ETC TC21 was established to coordinate the national input to the work of IEC TC101 with reference to:

- Standardisation in the field of electrostatics to provide general guidance on test methods to evaluate the generation, retention and dissipation of electrostatic charges.
- Ascertaining the effect of electrostatic discharges.
- Methods of simulation of electrostatic phenomena for testing purposes.
- Requirements for design and implementation of handling areas or procedures, equipment, and materials used to reduce or eliminate electrostatic hazards or undesirable effects.

3 Scope of TC

The work of ETC TC21 serves the needs of all sectors of Irish industry with the requirement to control electrostatic phenomena. This includes enterprises working the electronics sector, occupational and process safety and electrostatic nuisance management.

The committee mirrors the following international committee:

<table>
<thead>
<tr>
<th>Committee Name</th>
<th>Committee Title</th>

</table>

4 Structure and Membership

4.1 Structure

The Figure below illustrates the structure of the Committee:
4.2 Members

The table below provides the names of the members for the year:

<table>
<thead>
<tr>
<th>Organisation</th>
<th>Name</th>
<th>Role</th>
</tr>
</thead>
<tbody>
<tr>
<td>Independent Consultant</td>
<td>Gannon, Mel</td>
<td>National Chairperson</td>
</tr>
<tr>
<td>Compliance Engineering Ireland (CEI)</td>
<td>Brien, Lewis</td>
<td>Member</td>
</tr>
<tr>
<td>Kostal</td>
<td>Byrne, Coleman</td>
<td>Member</td>
</tr>
<tr>
<td>Dell</td>
<td>Evans, Joseph</td>
<td>Member</td>
</tr>
<tr>
<td>NSAI</td>
<td>Hickey, Stewart</td>
<td>Member</td>

</tbody>
</table>

5 Summary of 2018 Activities

5.1 National

5.1.1 Meetings

Committee members attended the following national meetings in NSAI as follows:

<table>
<thead>
<tr>
<th>Meeting No.</th>
<th>Date</th>
<th>Minutes Reference</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>16 May 2018</td>
<td>N517</td>

</table>

5.1.2 National Work

NSAI ETC TC21 was relaunched in 2018 allowing Irish experts’ participation in the development of the IEC 61340 series of standards by IEC TC101. The IEC 61340 series is comprised of five parts including Part 1 – General, Part 2 - Measurement methods in electrostatics, Part 3 - Methods for simulating electrostatic effects, Part 4 - Standard test methods for specific applications and Part 5 - Protection of electronic devices from electrostatic phenomena. 2018 saw the publication of IEC 61340-6-1 Edition 1, “Electrostatics - Part 6-1: Electrostatic control for healthcare - General requirements for facilities”.
5.2 International/Regional

5.2.1 Meetings
Committee members did not attend international CENELEC (CLC) or IEC meetings in 2018

5.2.2 International/Regional Work
ETC TC21 monitors the work of IEC TC101

5.2.3 International/Regional Standards Reviewed
101/542/CDV - IEC 61340-6-1 ED1: Electrostatics - Part 6-1: Electrostatic control for healthcare - General requirements for facilities

5.2.4 International/Regional Voting Results
6 documents (100% Voting Record)

5.3 Regulatory Development/Update
None.

6  Irish Publications/Reviews

6.1 Publications
The Committee did not publish any deliverables this year.

6.2 Reviews
The Committee reviewed the following Irish national deliverables:

7  Work programme for 2019 onwards
The work programme for ETCI TC21 will continue to be focused on the revision of standards in the IEC 61340 series.

8  Additional Information
Please see members of NSAI ETC TC21 in the photograph below.
