|--------------------------|--|-----------------------------------|------|
| Project reference | I.S. 401:201x | | |
| Project title | Safety requirements for rewirable and non-rewirable 13A fused plugs for normal and rough use having insulating sleeves on live and neutral pins | | |
| Current_Phase | Project Approved | International Project Ref. | |
| Committee | NSAI/ETC/TC 2 Electrical Installations | | |
| Officer | Stewart Hickey | Project Status | Hold |
| Scope | <p>This Irish Standard specifies requirements for 13 A fused plugs having insulating sleeves on line and neutral pins, for household, commercial and light industrial purposes, with particular reference to safety in normal use. The plugs are suitable for the connection of portable appliances, sound-vision equipment, luminaires, etc. in a.c. circuits only, operating at voltages not exceeding 250 V r.m.s. at 50 Hz.</p> <p>Requirements are specified for plugs incorporating a fuse link complying with BS 1362:1973. The plugs may be rewirable or non-rewirable complete with flexible cord.</p> <p>Two categories of plugs are specified covering normal and rough use. Rewirable plugs are intended for use with flexible cords complying with I.S. 201 or I.S. 202 having conductor cross-sectional areas from 0.5 mm² to 1.5 mm² inclusive.</p> | | |

| | | | |
|--------------------------|--|-----------------------------------|------|
| Project reference | I.S. 411:201x | | |
| Project title | 13A switched and unswitched socket outlets | | |
| Current_Phase | Project Approved | International Project Ref. | |
| Committee | NSAI/ETC/TC 2 Electrical Installations | | |
| Officer | Stewart Hickey | Project Status | Hold |
| Scope | <p>This Irish Standard specifies requirements for 13 A switched and unswitched shuttered socket-outlets for household, commercial and light industrial purposes, with particular reference to safety in normal use. The socket-outlets are suitable for the connection of portable appliances, sound-vision equipment, luminaires, etc. in a.c. circuits only, operating at voltages not exceeding 250 V r.m.s. at 50 Hz using plugs in accordance with I.S. 401.</p> <p>Requirements are specified for 13 A shuttered socket-outlets in single or multiple arrangements, with or without associated controlling switches, for flush mounting in suitable boxes, e.g. complying with BS 4662, or for surface or panel mounting or for portable use. Fixed socket-outlets are intended for use with cables complying with I.S. 201 or I.S. 202 having copper conductors. Portable socket-outlets are intended for use with flexible cords, complying with I.S. 201 or I.S. 202. Socket-outlets containing devices other than fuse links, switches and indicator lamps are outside the scope of this standard.</p> | | |

|--------------------------|---|-----------------------------------|------|
| Project reference | I.S. 421:201x | | |
| Project title | Safety requirements for adaptors for use with 13A socket outlets | | |
| Current_Phase | Project Approved | International Project Ref. | |
| Committee | NSAI/ETC/TC 2 Electrical Installations | | |
| Officer | Stewart Hickey | Project Status | Hold |
| Scope | <p>This Irish Standard specifies requirements for adaptors having insulating sleeves on the line and neutral plug pins and suitable for use with socket-outlets complying with I.S. 411, with particular reference to safety in normal use. Adaptors specified in this standard are intended for household, commercial and light industrial purposes. The adaptors are suitable for the connection of portable appliances, sound-vision equipment, luminaires, etc., in a.c. circuits only, operating at voltages not exceeding 250 V r.m.s. at 50 Hz.</p> <p><input type="checkbox"/> This standard also applies to shaver adaptors which have the brass earth pin replaced with a similarly dimensioned protrusion made of insulating material designated as an insulated shutter opening device (ISOD) designed to operate the shutter mechanism of a socket-outlet conforming to I.S. 411</p> | | |

| Current_Phase | Project Approved | International Project Ref. | EN 1594 |
| Committee | TC 001 SC04 TC 5 Transmission | | |
| Officer | Alice Hanly | Project Status | Not Published |
| Scope | Separation of current part two of I.S. 328 into a separate standard. (I.S. 328-2) | | |

| | | | |
|--------------------------|---|-----------------------------------|---------------|
| Project reference | I.S. 328-2:201x | | |
| Project title | Gas transmission - Part 2, Installations | | |
| Current_Phase | Project Approved | International Project Ref. | EN 12186 |
| Committee | TC 001 SC04 TC 5 Transmission | | |
| Officer | Alice Hanly | Project Status | Not Published |
| Scope | <p>Separation of current part two of I.S. 328 into a separate standard.</p> <p>This Standard applies to the design, construction, inspection, testing, operation and maintenance of installations on pipelines used for the transmission of first and second family gases, i.e., manufactured towns gas, natural gas and substitute natural gas at maximum operating pressure over 16 bar and temperatures between -25 oC and +120 oC</p> <p>Pipeline installations include but are not restricted to pressure-reduction stations, meter stations, pig-trap stations and block valves. Compressor stations and compressed gas filling stations are excluded.</p> <p>If the inlet pipework of the station is a service line and the maximum upstream operating pressure does not exceed 16 bar and the design flow rate is equal to or less than 200 m3/h under normal conditions, EN 12279 applies.</p> <p>This Standard relates to conditions and practices currently in use in the transmission of gas. In addition materials and techniques of construction and operation are constantly being improved. It is intended to keep these factors under continuous review. As a result</p> | | |

| | | | |

| Project reference | NA;201x to I.S. EN 16723-2:2017 | | |
| Project title | Irish National Annex to Natural gas and biomethane for use in transport and biomethane for injection in the natural gas network - Part 2: Automotive fuels specification | | |
| Current_Phase | Project Proposed | International Project Ref. | EN 16723-2:2017 |
| Committee | TC 001 SC05 TC 6 Use of CNG in vehicles | | |
| Officer | Alice Hanly | Project Status | Proposed |
| Scope | <p>This European Standard specifies the requirements and test methods for natural gas (group L and H, as in EN 437), biomethane and blends of both at the point of use as automotive fuels.</p> <p>This European Standard applies to the previously mentioned fuels irrespective of the storage state (compressed or liquefied).</p> <p>To check compliance with some requirements set by the standard, LNG or liquefied biomethane should be re-gasified prior to testing.</p> | | |

| | | | |
|--------------------------|---|-----------------------------------|---------------|
| Project reference | I.S. 3213:20xx revision | | |
| Project title | Code of practice for the storage of LPG cylinders and cartridges | | |
| Current_Phase | Project Approved | International Project Ref. | |
| Committee | TC 001 SC07 TC 8 Fixed bulk storage of LP Gas and LP Gas refuelling stations | | |
| Officer | Alice Hanly | Project Status | Not Published |
| Scope | <p>This code applies to the keeping of LPG in containers where the total quantity stored exceeds 15kg, but the general principles may be used when keeping smaller quantities. It also applies to containers on loaded vehicles parked other than on a public highway. The requirements of the Building regulations shall take precedence over any requirements of this Code.</p> <p>The contents of this document represent the general requirements for the safe storage of LPG cylinders and cartridges. However in specific circumstances the fire authorities may find it necessary to impose additional safeguards.</p> <p>It excludes:</p> <ol style="list-style-type: none"> 1) LPG containers being transported by road; 2) cylinders fitted to a vehicle to provide fuel for any purpose on the vehicle 3) the storage of aerosol products in which LPG is used as a propellant 4) the use of LPG from cylinders in domestic and other similar situations 5) LPG during the course of production | | |

| Project title | Fire detection and alarm systems for buildings - System design, installation, servicing and maintenance | | |
| Current_Phase | At Public Enquiry | International Project Ref. | |
| Committee | TC 016 Fire Safety Standards Committee | | |
| Officer | James Clarke | Project Status | Not Published |
| Scope | <p>This Standard provides requirements and recommendations for the planning, design, installation, commissioning, servicing and maintenance of fire detection and alarm systems in premises including those used for residential/domestic purposes. The Standard does not recommend whether or not a fire alarm system should be installed in any given building (see Building Regulations, Technical Guidance Document B). When it has been determined that a Fire Detection and Alarm System (FDAS) is required, this standard is suitable.</p> <p>The systems covered in this Standard are referred to as Fire Detection and Alarm Systems (FDAS). The Standard covers systems ranging from simple installations with one or two manual call points, up to complex installations with automatic detectors, manual call points, control and indicating equipment, communication with the public fire service, etc. It also covers the provision of signals to initiate, in the event of a fire, the operation of ancillary services (see 6.16) and other precautions and actions, but it does not cover the ancillary services themselves.</p> <p>Consultation with the appropriate Fire Authority is advised before undertaking the design</p> | | |
